

Lumin Bachman Lake Community School Brigance Inventory of Early Development III

Lumin Bachman Lake Community School (LBLCS) selected the assessment instrument Brigance Inventory of Early Development III because it aligns with our School Readiness Goals.

We implemented the Brigance Inventory of Early Development III in February of 2014 and the assessment was given to all of the children in the program. Data was collected and aggregated using the results of each individual record booklet.

The initial application of the Brigance Assessment indicated areas of strength in these domains: Social Emotional, Cognition and General Knowledge, and for toddlers Physical Development and Health. The domains which needed further development included Physical Development and Health for infants to 14 months, Prespeech Expressive Language for both age groups (infants to 14 months and 15 months to 3 years old) and Receptive Language for 15months to 3 years old.
