

Lumin Education Health and Safety Protocols for COVID 19

School Year 2022-23

As of July 12, 2022

Safety is our top priority, and we will keep this protocol updated based on Texas Education Agency, Texas Department of State Health Services, Dallas County Health Department, and others.

Masks and PPE

We are not requiring students, staff, or visitors to wear masks, unless requested by COVID Coordinator. PPE, including masks for children/adults, and hand sanitizer, will be available at every campus for voluntary use. Frequent handwashing is an important and recommended prevention strategy we will practice.

Campus Cleaning and Ventilation

Enhanced ventilation and cleaning will continue. We are providing air purifiers and a HEPA air filtration system (HVAC) throughout our buildings. We clean and disinfect highly touched surfaces frequently. Classroom materials will be disinfected regularly. E-mist electrostatic disinfecting spray will be used throughout the campus twice a month and more frequently if needed.

Screening and Temperature Checks

At this time, Lumin will not be performing temperature checks or asking screening questions upon entry to facilities. Anyone who is sick should stay home, contact their campus/supervisor immediately, and follow the protocols for students and staff below.

For Students:

If your child is feeling sick, please stay home and contact your physician and campus as soon as possible. If your child tests positive for COVID-19, he or she will be required to isolate, and a timeline will be established for a return to school by the COVID Coordinator. A Lumin employee will contact you to determine quarantine and return-to-school requirements.

For Staff:

If you are feeling sick, please stay home and contact your physician and supervisor as soon as possible. If you test positive for COVID-19, please contact your supervisor. A Lumin employee will contact you to determine quarantine and return-to-work requirements.

COVID-19 Vaccines

Getting a COVID-19 vaccine helps to lower your chances of getting COVID-19, spreading it to others. It is not required to get a COVID-19 vaccine, but strongly encouraged for age 5 and older.
